as Authorized local representatives
for Retail Sales and Service of

The NEW RADIO
as interpreted by
DE FOREST & CROSLEY

Let us demonstrate to you the new efficiency achieved in this "R" series of models—the wonderful simplicity and precision in tuning—the new realism of tone—the many improvements and refinements—the new era of beauty—the unsurpassed value. Demonstration without obligation.

Easy monthly payments, if desired.

Calendar

- Oct. 31—Halloween in dance at Glen Valley.
- November—
- 5—Helge Anderson's orchestra, Halborn Hall.
 - 6—Inga Connollys meet in Stony Plain.
 - 9—Thanksgiving Day.
 - 11—Auction sale at Val Kulak's farm, 2 miles north of Stony.
 - 12—Sale of lands by Spruce Grove M. D.
 - 13—Vote of Authority, a play by the Girls' Club.
 - 28—Union Ladies' Aid's annual bazaar.

Friday's Big Show

"Aunt Mary's Family Album," under the auspices of the Women's Institute, was shown in Ducholke hall last Friday, Oct. 29, to a well filled auditorium.

The play is founded on the beautiful story of the love of a dear old Irish lady for the old-time pictures of her friends some of whom are just and gone. The part of the Irish lady, Mrs. Kelly, was admirably taken by Mrs. Brooks, whose representation of this difficult role left nothing to be desired. The dear old lady

**FURS AND
OVERCOATS
Repaired and
Re-lined.**

PAUL WERNER,
Opposite Royal Hotel.

gave, in a very charming manner, the details of each picture as shown. Mrs. Kelly impressed it on the auditors that she had a good husband.

The photos in the "album" were almost life size, some of the characters wearing a very noticeable smile, particularly when the juveniles in the audience recognised some of their friends. "Aunt" had a little trouble with the picture of the Marquis of Lorne, as there was a blank when the curtain was drawn, but presently the character sprang into place and immediately assumed a heroic pose.

The proceedings were enlivened by a duo duet from Mrs. Outway and Miss Macnabb, and a selection on the violin from Mrs. Jas. Smith.

Each and every one of those who participated in the play acquitted herself in a highly satisfactory manner. Following is the list of those who participated, and the part taken by each:

Mrs. Kelly, Mrs. Brooks
Mrs. De Vere, Mrs. Clark
Mrs. Baprou, Mrs. Lory
Mrs. Goudens, Mrs. Kowenacky
Mrs. Vernon, Mrs. Outway
Mrs. Good, Mrs. Michael
Rachel Thomas' wife, Mrs. Elliot
Miss Skinning, a man hater,
Mrs. Jas. Smith
Mrs. Bunkle, Mrs. Duthie
Mrs. Meek, Mrs. Umbach
Mrs. Bond, Mrs. M. Simpson
Mrs. Lane, Mrs. Kibblowitz

The dance which followed drew a big crowd, Stony being well represented, and delegations from the Grove and the City being present.

LOCAL NEWS.

Saturday, next is Red Cross Day.

Mr. Iver Klevin leaves next week to take treatment at the baths, Jasper Park.

Mr. Irwin Umbach has returned to Stony, from the South.

Mrs. Britten and the boys have taken up their residence in the Bank building, on Main street.

A wireless from Carl Fiver says he landed yesterday at Glasgow, Scotland, his first meal consisting of haggis and usquebaugh. When he recovers he will resume his journey.

Mr. H. O. Te-williger is leaving shortly on a trip to the Coast, to reside. Harry has sold his car to Mr. Tony Dairmont.

Both trains going East on Monday morning were three hours late.

The cold spell this week caught a lot of people unprepared to withstand the cold, and the goat dealers were not stocked up.

Mr. Moyer is taking orders for that excellent coal from Mile Five which he handled last winter.

Hon. Chas. Stewart gave an address in Stony Saturday night. The meeting was presided over by Dr. Outway.

Candidate East, representing the U. F. A. in this constituency, held a meeting in town Tuesday night. Attorney Gen. Brownlee also addressed this meeting.

Decree nisi to become absolute in three months was granted by Chief Justice Simmons at Edmonton on Oct. 14 in the divorce proceedings E. C. Schudek v. Emma Schudek. Wells & Richards, barristers, acted for the plaintiff.

Auctioneer McKenna held a very successful sale on Saturday last in Stony of a quantity of Army supplies—trench shovels going for two-bits a piece, fork handles 6c, and plow harness \$10 a set.

Johnny Miller has got in a carload of the new type Ford cars. The changes in these new cars are more pronounced than any in a number of years. The changes include lower all steel bodies on a lower chassis, larger lower fenders; the higher radiator and redesigned cowl are very noticeable in the open types. The new cars have larger compartments, deeply cushioned seats and greater leg room. The gasoline tank is under the cowl, by the engine. A number of other improvements make the new Ford a very nifty car, and the price remains the same. The cars are on the floor of the Stony Plain Garage, and should be seen to be appreciated.

Mr. Val Kulak Jr. is holding a clearance sale, at his farm, of stock and implements, on Wednesday Nov. 11th. See posters.

The U. S. As a Magnet

During the general election campaign the subject of emigration and immigration as between Canada and the United States received a great deal of attention. It was discussed pro and con, and masses of figures were thrown at the electorate to support this argument or to prove that contention. Whether the general run of people are any wiser is open to question.

It did not, however, require all these verbal fireworks to convince people of one thing, and that is, that the United States does constitute a powerful magnet drawing tens of thousands of people annually from Canada. Politicians may disagree as to the underlying reason for that magnetic power, but that it exists it would be useless, in the face of patent facts, to deny.

Without assuming to question that United States fiscal policies may have a bearing, past and present, in promoting the conditions across the line which now seem attractive to many people, it is natural that the United States should today exercise a great drawing power. From the standpoint of climate, certain sections of the United States attract many people from this more northerly land, just as they draw thousands from other portions of the big republic.

But the real attraction is found in the "bigness" of the United States, and especially of its cities. People, as a rule, like big things. They are usually regarded as meaning excellence and success, although often mistakenly so. Consequently the big cities and big institutions of the United States, doing things in a big way, attract.

It is the same influence at work which draws people from all over the United Kingdom to London; causes Frenchmen to flock into Paris; leads the youth of Ontario to go to Toronto; and of Manitoba to Winnipeg. Just so do Canadians naturally turn southward to New York, Chicago, Los Angeles and other large centres. It is natural; it is inevitable. As Canada grows, the power of this great magnet will be lessened, but regardless of national policies on either side of the line it will never wholly disappear.

From the purely Canadian standpoint, the most regrettable feature is that it is among the big cities of the United States that the greatest opportunities for our engineers, electricians and mechanics, for our most learned professors, our cleverest doctors, our ablest writers, authors and artists, in a word, the cream of our population fitted for leadership, that it involves an enormous personal sacrifice to reject the offers made to them. Usually they go, and the only gain to Canada is the influence they exert in the life and thought of our great neighbor, resulting in the fine understanding and good relations which exist between the two countries.

But will this "bigness" prove a good thing for the United States in the long run? And in the final analysis will the policies which have assisted to develop such "bigness" prove a strength or a weakness to the nation?

Time alone will provide answers to these questions, but already signs are not lacking giving concern to the most thoughtful students of public affairs. The big cities of the United States are not only attracting Canadians, but they are drawing the American people away from their farms, their hamlets, villages and small towns.

For example, the farm census of 1925 conducted by the United States Department of Commerce discloses 75,756 fewer farms than existed in 1920. And as farms decrease in number so does the number and population of hamlets, villages and towns dependent on rural life and progress for their existence.

During these same five years the population of the United States increased through natural causes alone by seven and one-half million. That is to say, with 7,500,000 more mouths to feed, there were 75,000 fewer farms engaged in raising food products. The people are congregating in the large cities and towns, becoming consumers of food, but not producers of it.

Canada, being a highly industrialized nation and the greatest food-importing country in the world, today it is still importing its food supplies, but a million and a half people are out of employment, living on doles provided by the Government for them and their families. President Coolidge stated not many months ago that the United States had reached the point where, from being the world's greatest exporter of food it would shortly become the world's greatest importer of food.

Any policy which in its effect draws the people away from the sources and activities of primary production into industrial undertakings in congested centres of population, not a sound national policy. Such industries exist to provide the masses of the people with articles they may require, and one such industry can supply thousands. If and when the majority of the people are drawn into manufacturing and allied industries, and more such goods are being turned out than there are people to purchase, then the situation which exists in England today, is bound to come.

The United States industrial magnet may attract Canadians at present, but the day is coming when the magnet of the great producing areas of Canada will prove still more powerful. People can get along without many of the articles of manufacture, but they must have food, and the nation which is in a position to provide not only food for its own people, but large surpluses for export, is the truly strong, prosperous and contented one.

Thinks Science Most Fruitful Field For Canadian Genius

Delivering his annual address at the annual prize giving of Upper Canada College, at Toronto, Principal Grant said:

"I make no apology for putting scholarship in the forefront. Never had Canada more need than today for disciplined intellect in every branch of our national life, and the boy who has won a university scholarship has at least the beginnings of intellectual discipline and even of intellectual distinction.

"A plain appeal for some kind of discipline to give us outright or at least to start, a fund for a new science laboratory. My own view is that along the path of scientific research, already so well trodden by such men as Professor Maclean and Dr. Banting, rather than along that of literature, lies the most fruitful field for the Canadian genius.

GUARD THE BABY AGAINST COLDS

By Keeping Baby's Own Tablets in the House at All Times

To guard the baby against colds nothing can equal Baby's Own Tablets. The Tablets are a mild laxative that will keep the little one's stomach and bowels working regularly. It is a recognized fact that where the stomach and bowels are in good order that colds will not exist; that the health of the little one will be good and that he will thrive and be happy.

Thousands of mothers have become convinced through the actual use of the Tablets that there is nothing to equal them in banishing constipation and indigestion; breaking up colds and simple fevers; expelling worms and making teething time easy. Among the thousands who praise Baby's Own Tablets is Dr. A. J. Perry, Atlantic, N.S., who says:—"I always keep Baby's Own Tablets in the house as I know of no other medicine for little ones to equal them."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Revenue From U. S. Tourists

More Than Two Million Automobiles Crossed into Canada This Year

Tourists from the United States have brought \$150,000,000 in revenue to Canada this year, according to estimates of Canadian Government officials. More than 2,000,000 American automobiles, it is estimated have crossed into Canada already this year. They carried approximately 9,000,000 tourists, of one tourist for every man, woman and child in the Dominion. Every province shared in the tourist business. Ontario received the larger traffic. Last year 1,376,938 cars from the United States entered Ontario, of which 103,378 of which stayed from two to thirty days, 1,545 from one to six months, and the remainder shorter periods.

Awarded Wembley Medal

Canadian National Railways Exhibit

Award of the certificate of honor and commemorative medal for 1924 to the Canadian National Railways exhibit at Wembley, was announced in a cable received at the C.N.R. offices at Winnipeg. The awards for 1925 will not be made for some months yet. Visitors who saw the exhibit in the pavilion of the Canadian National Railways at Wembley in 1924 were unanimous in describing it as one of the outstanding features of the display. Their Majesties King George and Queen Mary, H.R.H. the Prince of Wales, the King and Queen of Spain, and the Prince of Siam were among those to express their opinion of the size and variety of the C.N.R. exhibit.

SUNDAY SCHOOL LESSON

NOVEMBER 1

THE FIGHT AGAINST STRONG DRINK (WORLD'S TEMPERANCE SUNDAY)

Golden Text: Be strong in the Lord, and in the strength of His might. Ephesians 6:10.

Lesson: Ephesians 6:1-20.

Devotional Reading: Psalm 94:1-8.

The Text Explained and Illumined. The Christian's Spiritual Warfare, verses 10, 11.—To be a Christian is to be a soldier engaged in warfare against evil, and the strength for the fight comes from God. "Not that we are sufficient of ourselves, but our sufficiency is from God," as Paul wrote to the Corinthians. "Apart from me ye can do nothing," said Jesus himself in our lesson, about the Vine and the Branches. "Be strong in the Lord and in the strength of His might," Dr. Jowett thinks this an imperfect translation because it lays too much emphasis upon the soldier and too little upon his Lord, and he refers us to the preferable marginal rendering of the Revised Version: "Be made powerful in the Lord."

"Does not that word sound full of promise for soldiers who are about to form a difficult position? Let God make you powerful! Such power is not a trophy of battle; it is the fruit of communion. It is a bequest and not a conquest. That power is not something we have to win; it is something we have to receive. The phrase 'in the Lord,' means communion with a power-house whose energy would light up all the common lamps of life—the lamps of hope, of faith, of love, of daily labor, of human service."

To come, if victorious in the fight against evil, Verse 12 reiterates this counsel, and verses 14-18 specify what these helps are.

No need to suffer with corns, or to run the risk of paring them. Remove them surely and painlessly with Howland's Corn Remover.

Poly: "What makes you so sure that you cannot afford to own a car, old man?"

Bowles: "I have one."

Most Northerly Radio Station Now Keeps Arctic Circle In Daily Touch With Civilization

The Arctic circle is now in daily touch with civilization, through the formal opening to the public by the department of interior and department of national defence, of the most northerly commercial radio station in Canada. This station is located at Akivik, at the mouth of the Mackenzie River, and lies 1,300 miles north of Edmonton and 125 miles beyond the Arctic circle.

The new station, in conjunction with others in the north, will supply a communication service for the Northwest Arctic and the Mackenzie basin, and will undoubtedly be of great value to the many trading and transportation companies operating in that district. The country, it is pointed out, is a very rich in furs, the yearly export running into many hundreds of thousands of dollars. There are also evidences of rich mineral deposits, but this resource has yet to be developed. The oil wells at Fort Norman, 300 miles south of Akivik, are already being developed, it is officially stated, and fuel oil and gasoline can now be obtained locally, practically within the Arctic circle.

The opening of the Akivik station and the previous opening of the Fort Smith station on Sept. 6, marks the completion of the department's work on the western portion of the project in which the Northwest Territories branch is interested. It will be recalled that the equipment of Akivik station was lost when the Lady Kindersley, of the department's company fleet, sank off Point Barrow in August, 1924. The completion of the Northwest Territories radio system had, therefore, to be postponed for a year until new equipment and stores could be shipped in along the Mackenzie River this summer.

Going Back To Grain

Predicts U. S. Cattle Lands Will Be Planted in Wheat

Ten million acres of sod in the southwest, heretofore used for cattle ranges, will be planted in wheat within the next eight years, C. C. Isler, of Dodge City, Kansas, predicted in an address at the 29th annual meeting of the Grain Dealers' National Association at Kansas City, Mo., last night.

He said prosperity was ahead for the large farmer of Northern Texas, South Dakota, Oklahoma, Colorado and Western Kansas if the change to grain from cattle is made. Much of the acreage which he pointed to as fertile wheat lands have been underdeveloped, Isler declared.

"This is the first year the United States has seen a domestic wheat basis," he said, "and it is the first year that the wheat tariff has benefited the farmer."

No Crop Failures

Stated That There Was Not One Crop Failure in Manitoba

Not one crop failure in the province of Manitoba is the report of the provincial department of agriculture recently released. Out-turns from threshing machines are satisfactory and a generally optimistic tone prevails. Ninety per cent. of the crop is threshed in the Red River Valley and as far west as Portage la Prairie, and other farm work well in hand. Averages per acre from 11 reports received show wheat yielding 10 1/2 bushels; oats, 14 bushels; barley, 32 bushels; flax, 12 bushels; feed, 19 1/2 bushels. These are higher in every case than final averages for the 10 past years.

Potatoes promise a good crop. Pumpkins are better than in years. Ploughing is nicely started. Stock is in good condition. The dairy industry is showing increase of butter output over last year.

Earth Tremors Growing Pains. A "headache" with minor aches and pains, explains Prof. Charles W. Brown, geologist of Brown University, Providence. The series of earthquakes on the Atlantic and Pacific seaboard this year are mere evidence of growing pains, he says, in geological history. When the earth finally gets adjusted and settled in old age, there will be no more quakes.

W. N. D. 1660

Union Production

Six Carloads Shipped To New Zealand From Okanagan Valley

A rather unusual consignment of six carloads of onions recently left the Canadian Pacific coast for New Zealand, there having been grown in the Okanagan Valley. The shipment is worthy of note because, not only is Canada producing insufficient onions for her own use, but New Zealand has been one of the countries from which the Dominion imported in the past. The placing of an embargo on the California product by the Antipodes last year gave British Columbia onion growers an opportunity of which they took advantage. Out of the shipments made in 1924 a volume of business has developed which it is expected will be permanent and increasingly profitable. The total onion production of Canada in 1924 was 1,095,000 bushels, as compared with 748,000 bushels in 1923, according to the figures of the federal department of agriculture. The provinces of Ontario and British Columbia accounted for almost the entire commercial production. The markets of the British Columbia crop are indicated in the distribution of the 1925 production when of a total of 4,000 tons, 1,500 tons went to cities on the Pacific coast and more than 2,000 tons to the prairie provinces.

Deposits Of Marl

Valuable Substance Is Found In Nearly Every Province of Canada

Deposits of marl, according to Dr. P. T. Shutt, Dominion chemist, who during 1923-24 was called upon to analyze some forty samples received from Ontario, Quebec, New Brunswick, Nova Scotia, Alberta and British Columbia, are found in nearly all the provinces of Canada, and are important and valuable sources of lime for land treatment. They occur in beds from a few inches to several feet thick on cold lake bottoms and are often covered by peat or musk. Some marls are almost pure carbonate of lime while others contain more or less clay, sand, organic matter, etc., which decrease their value for agricultural purposes. Marls, as fertilizers, are usually soft and decay in consistency, frequently absorbing small shells. On air-drying by simple exposure they are found to be readily friable, breaking down to a coarse granular state easily permits of uniform distribution on the land.

Fish Catch Increased

Quantity and Value of Sea Fish Caught On Both Coasts

An increase of 9,456,400 pounds, or 26.4 per cent, is shown by the total quantity of sea fish landed on both coasts of Canada during August, 1925, as compared with the month of August, 1924.

The amount landed on the Atlantic and Pacific coasts of Canada last August was 122,335,700 pounds, with a value to the fishermen of \$3,171,735, as against 114,459,300 pounds, valued at \$3,085,693 during August last year. The increased quantity, states the department of marine and fisheries, is due altogether to larger catches of cod and herring on the Atlantic coast and pilechards on the Pacific coast. On the Atlantic coast of cod, haddock, hake and pollock taken during the month of August. This is an increase of 12,416,300 pounds over August of last year, when 22,152,400 pounds were taken.

Spartan Race Impassible

Have you had your ultra violet ray this morning? If you have, your health may be "an almost automatic affair," according to Dr. C. M. Westerman, in an address to the Physiotherapeutic Association at Chicago. The doctor said that if everybody could get his full share of the ultra violet, a Spartan race would be created. But smoke and dust and tall buildings intervened, he said.

Ruhr Region Completely Evacuated. The last French detachment which had remained at Ruhrort for the protection of the interned Rhine shipping commission has left. The Ruhr region now is completely evacuated.

Electric Ship Transports Grain

Carries 70,000 Bushels of Barley From Duluth to Montreal

Montreal placed another notch on its history stick when the Twin Cities, the first electrically driven ship to use the port of Montreal, left after unloading 70,000 bushels of barley.

The Twin Cities, owned by the Minnesota-Atlantic Transit Company, came from Duluth. Her gross tonnage is 1,460 tons and she is capable of carrying 2,100 tons on a fourteen-foot draught.

The boat, which gave the appearance of a dismantled ship, is entirely electrically driven. She is controlled from the wheelhouse. Her engines are the Diesel electric type, and one of the features of the ship, that is she is propelled by twin rudders and twin screws, both of which are controlled from the wheelhouse.

When coming through the canal the motor, driven by wheelhouse, was brought down to gunwale level to permit the boat to pass under the stationary bridges in the canal.

Capt. Martin Peterson was in charge of the boat and crew of sixteen, and he stated this was the first trip made to Montreal.

Her speed is ten knots an hour and all she requires, he said, on the trip from New York to Wallaceton, Ont., to Detroit and back to New York is thirty tons of oil fuel.

All of her appliances are of the electric type. Her galley, for instance, is electrically operated; and she has accommodation for 600 tons of package freight electrically refrigerated. She expects to maintain a regular service to this port with the sister ship, the Twin Ports, both of which are the invention of Henry Penton, of Cleveland, Ohio. Both boats cost in the neighborhood of \$500,000.

Indian Lookout Used

By Forestry Service

California Rangers Keep Watch in Pine Trees 200 Feet High

An Indian lookout in the form of a venerable pine tree, in the vicinity of Lake Arrowhead, Cal., is one of the valuable aids to the United States forestry service. The ancient tree, nearly 200 feet high, serves the ranger and lookout ever as it served Indian warriors, scores of years ago in Indian days. At the base of the pine stands blazed in the past by the Indians may be seen daily. Today keen-eyed rangers keep continual watch in the upper branches for forest fires. They are equipped with powerful glasses and telephones, in modern contrast to the sharp eyes of the aboriginal lookout and his crude wig-wag system.

Aeroplane For Women

A dainty little aeroplane designed especially to appeal to feminine tastes has appeared in the London market. It is being sold for £300 (about \$1,500). It is a one-seater and is built, the manufacturers say, "for the women only."

The Royal Aero Club of Great Britain has granted flying certificates to seven women.

Utilization Of Straw For The Manufacture Of Paper May Mean Much To Western Farmer

Wheat Belt To Move North

Discovery of "Garnet" Wheat Will Extend Crop Area

It is reported that the new wheat called the Garnet may push the wheat belt 100 miles farther north. The new wheat is said to be rust resistant and if the claims advanced for it by L. H. Newman, cereal specialist of the Canadian Government, prove true, it will be a rival of the famous Marquis wheat, now the popular wheat in Canada and among the majority of American wheat growers.

Claims advanced by the Canadian official for this new wheat are that it is a much heavier yielder than the Marquis, under any condition producing almost twice the crop, and that it ripens from a week to ten days earlier than the Marquis, which enables it to escape the possibilities of rust and early frosts.

The wheat has been distributed throughout Canada for further tests. It continues to justify its early promise the rust problem will be reduced to a minimum. This pest causes losses of millions of dollars and wheat growers are anxiously awaiting the results of the tests with the new grain.—Montreal Witness.

Manitoba Sugar Beets

Plots Grown For Experimental Purpose in Eastern and Southern Parts of Province

The analysis of sugar beets grown on experimental plots in Manitoba has commenced and will continue for the next month, according to the secretary of the Manitoba Sugar Company. These beets, grown on a purely experimental basis, have been produced on a total of 260 plots throughout the eastern and southern portions of the province, chiefly in the Red River and Assiniboine valleys. The early wet weather was a handicap to the beet crop as it delayed maturity and the cutworms were bad in places. In spite of these factors 99 per cent. of the crop is quite satisfactory. A few cars will be shipped to Chaska, Minn. for commercial trial at the factory there. Arrangements are already being made to increase the acreage considerably for next year, when it is hoped to ship the crop to the factory now under construction at Grand Forks.

Clock 700 Years Old

On the Wells Cathedral in London is a clock, constructed by a monk from primitive material and with primitive tools, some 700 years ago, but which still is in faultless condition. Besides giving the hour, the clock records the quarters of the moon and of the stroke of the hour a group of medieval figures break into life and whirl round until the last chimes die away.

The future of the paper industry, and indeed, the future of the whole trade of printing, causes perennial anxiety to those, gloriously associated with either owing to the diminishing supply of paper material from wood. The United States has become the greatest consumer of paper in the world, and as its own soft wood supplies have neared exhaustion, it has come to depend largely upon Canada, and to draw more and more upon Canadian forests.

Not long ago the London Morning Post published an issue on paper made from straw, and the unqualified success seems to have definitely lifted the question from theory to practice. The trouble experienced in the past, as stated, has been with the brittleness of the paper, but ten years' experiments have overcome this difficulty. This is Valno process, as it is known, has been perfected in French factories, and, according to the same paper, the work is to be continued on a large scale in Canada.

For some considerable time experts' minds have been in process in Canada looking to the utilization of western straw piles in the manufacture of paper. Under the sponsorship of the Canadian Pacific Railway a method for the utilization of straw in the manufacture of pulp for conversion into high grade papers was perfected. More recently tests have been made with wheat, oat and other straw under the Bache-Wilg process at Edmonton, Alberta. Government experiments, with such success that efforts are being made by the provincial authorities to interest capitalists in the commercial manufacture of this product in Alberta.

It would seem inevitable that sooner or later straw will become a raw material in the manufacture of paper. This will mean a gigantic industry for Canada and the definite removal of any danger of a loss of supremacy in the newspaper industry through dwindling forest supplies. Such an industry will, in addition, mean the utilization of an enormous by-product of farming which is now wasted, for it is estimated that 7,000,000 tons of straw are burned annually in the Dominion, and this is increasing yearly. In Eastern Canada there is a use for straw in connection with the livestock industry, but in the west the burning of straw piles after threshing is a sad feature of an unbalanced industry. The advent of straw paper making will bring additional revenue, more employment, preserve a great industry for the world, and retain an export trade for Canada of prime importance.

Shipping More Butter

British Importers Taking Large Quantities of Canadian Product

Butter exports via Montreal are more than twice as heavy so far this year as they were in 1924, and the movement of cheese is also larger, although not in the same proportion. During the period, May 1st to the middle of September, exports through the port of Montreal amounted to 265,157 packages of butter and 757,633 of cheese during the same months of 1924. During one week in September, 11,222 packages of butter and 69,465 boxes of cheese were shipped, Manchester, Liverpool and London, taking large quantities of both, and Bristol a heavy consignment of cheese.

Competition At Regina

Girls and Boys to Show Aberdeen Angus Calves at Winter Fair

Girls or boys in Saskatchewan who wish to get Aberdeen Angus calves to show at the Winter Fair in 1926 should apply to the Secretary of the Saskatchewan Aberdeen Angus Club.

Breeders of Aberdeen Angus cattle having calves born in 1926 (pure-bred or cross-bred) suitable for sale and to show in the Winter Fair of 1926 are requested to communicate the fact to James Brown, Secretary, Sask. Aberdeen Angus Club, Neudorf, Sask.

Wife: "How do you like my cake?" I got the recipe, not the radio; it's a western idea."

Husband (trying to bite into the cake): "That recipe must have been broadcast through the Rocky Mountain time."

Captain R. G. Latta

Who has been appointed to the command of the Empress of Scotland, flagship of the Canadian Pacific fleet in succession to Captain James Gillies, who was recently appointed manager Canadian Pacific steamships in London. Captain Latta has been with the company since 1905 and for the last two years has been on the bridge of the Empress.

"BAREE, SON OF KAZAN," a Vitaphone Picture, With Wolf, the War Dog.
Is an Adaptation of This Story

SYNOPSIS
McKegart, the factor, had gone to the cabin of Pierré, the trapper, to claim Pierré's daughter, Nepeese, as his bride. Nepeese had been the brack of the chasm. He put his arm about the girl, but she, hatred flaring up in her, freed herself and pushed him over the brink and into a pool twenty feet below. Then returning to the cabin, Nepeese fondled Barce, the wolf-dog. Her touch thrilled the young untamed animal. Under her caress his eyes closed, but at sound of her voice they shot open again.

CHAPTER XIV.—Continued.
"He will come here," that beautiful and he will kill us," she was saying. "He will kill you because you bit him, Barce. Ugh, I wish you were bigger and stronger so that you could take off his head for me!"

She was untangling the babble from about the table-leg, and under her breath she laughed. "She was not frightened. It was a tremendous adventure—and she throbbed with exultation at the thought of having beaten the man-beast in her own way. She could see him in the pool struggling and beating about like a great fish. He was just about crawling out of the chasm now—and she laughed again as she caught Barce up under her arm."

"Oh—opting—but you are heavy!" she gasped. "And yet I must carry you—because I am going to run!"

She hurried outside. Pierré had not come, and she darted swiftly into the balsam-bush of the cabin, with Barce hung in the crook of her arm like a sack filled at both ends and tied in the middle. He felt like that, too. But he still had no inclination to wriggle himself free. Nepeese ran with him until her arm ached. Then she stopped and put him down on his feet, holding to the end of the caribou-skin thong that was tied about his neck. She was prepared for any lunge he might make to escape. She expected that he would make an attempt, and for a few moments she watched him closely, while Barce, with his feet on earth once more, looked about him. And then the Willow spoke to him softly.

A WOMAN'S SUFFERING

Relieved by Lydia E. Pinkham's Vegetable Compound

F. Verdun, Montreal, Quebec.—"I am one of thousands who have taken Lydia E. Pinkham's Vegetable Compound and I have great faith in it. I can safely say it has relieved my troubles and I shall never be without a bottle of it in my house. Since my baby was born I suffered from pains and backache and would feel so tired I could not do anything in my house. Since I have been taking the Vegetable Compound and Lydia E. Pinkham's Blood Medicine I feel so different. I recommend it to all my friends and hope it will cure other women who are suffering from the troubles I had."—Mrs. THOMAS H. GARDNER, 321 Evelyn Street, Verdun, Montreal, Quebec.

Lydia E. Pinkham's Vegetable Compound is a dependable medicine for the new mother. It is prepared from roots and herbs, contains no harmful drugs and can be taken by the nursing mother. Its worth in restoring the mother to normal health and strength is told again and again in just such letters as Mrs. Gardner writes.

A recent canvass of women users of the Vegetable Compound shows that 36 out of every 100 women taking the medicine are benefited by it. They write and tell us so. Such evidence entitles us to call it a dependable medicine for women. It is for sale by druggists everywhere.

Transportation Problems

Says Ocean Combine Extracts Large Sum From Settlers

W. T. R. Preston, investigator of the North Atlantic combine, declares the steamship combine had extracted \$50,000,000 from settlers coming to this country. Mr. Preston expressed confidence that there would be a population of 25,000,000 in Canada within twenty years if the people of today assisted in breaking transportation combines on both land and sea.

BOTHERED WITH ECZEMA IN RASH

Face Was Disfigured. Healed by Cuticura.

"Some time ago I was bothered with eczema which broke out on my face in a rash. I took medicine of it at first until the trouble began to spread and the irritation caused rows to scratch. My face was disfigured and the trouble lasted about three months. "I tried different remedies but none seemed to do any good. I heard about Cuticura Soap and Ointment and purchased some, and after using three cakes of Cuticura Soap and one box of Cuticura Ointment I was completely healed." (Signed) Miss Gladys Fahl, 353-31st St. S., Milwaukee, Wis., Sept. 25, 1924.

Use Cuticura to clear your skin.

Get Cuticura Soap and Ointment at any drug store, or by mail from Cuticura Shaving Stick Co.

Willow's hand. He drew back slowly and cautiously from her lap, and as Pierré advanced, he started. The next instant Nepeese had risen and had run to Pierré. The look in her father's face alarmed her.

"What has happened now, per?" she cried.

Pierré shrugged his shoulders.

"Nothing, ma Nepeese—except that you have roused a thousand devils in the heart of the Factor from Lac Bain, and that—"

He stopped as he saw Barce, and pointed at him.

"Last night when M'sieu the Factor caught him in a snare, he bit M'sieu's hand. M'sieu's hand is swollen twice its size, and I can see his blood turning black. It is pechipo!"

"Pechipo," gasped Nepeese.

She looked into Pierré's eyes. They were dark, and filled with a sinister gleam—a flash of exultation, she thought.

"It is the blood-poison," said Pierré, a gleam of cunning shot into his eyes, as he looked over his shoulder, and nodded. "I have hidden the medicine—and told him there is no time to lose in getting back to Lac Bain. And he is afraid—faint devil!"

He was waiting. With that blackening hand, he is afraid to start back alone—and so I go with him. And—listen, ma Nepeese. We will be away by sundown, and there is something you must know before I go."

Barce saw them there, close together in the shadow thrown by the tall spruce trees. He heard the low murmur of their voices—chiefly of Pierré's, and at last he saw Nepeese put her two arms up around the man-beast's neck, and then Pierré went away again into the forest.

CHAPTER XV.

For a long time after Pierré left them the Willow did not move from where she had seated herself beside Barce. It was at last the deepening dusk, and a near rumble in the sky that roused her from the fear of the things Pierré had told her. When she looked up, black clouds were massing slowly over the open space above the spruce-tops. Darkness was falling. In the whisper of the wind and the dead stillness of the thickening gloom there was the sullen brewing of storm.

Nepeese shivered and rose to her feet. For the first time Barce got up, and he stood close at her side. Above them a lightning-flash cut the clouds like a knife of fire, followed in an instant by a terrific crash of thunder. Barce shrank back as it struck.

It would have struck into the shelter of the head-wall of the wigwam, but there was something about the Willow as he looked at her which gave him confidence. The thunder crashed again. But he remained motionless. His eyes were fixed on Nepeese.

On that night, it may be, the Spirit of Storm was born in Nepeese. She

loved to face it, as she was facing it now. It made her forget all things but the splendid might of nature; and her half-wild soul thrilled to the crash and fire of it; often she had reached up her bare arms and laughed with joy as the deluge burst about her. Even now she might have stood there in the little open until the rain fell, if a white from Barce had not turned her. As the first big drop struck with the deluge that of London bullet about them, she went with him into the balsam shelter.

Once before Barce had passed through a night of terrible storm—the night he had hidden himself under a root and saw the tree riven by lightning; but now he had company, and the warmth and soft pressure of the Willow's hand on his head and neck filled him with a strange courage. He gripped softly at the crashing thunder. He wanted to snare at the lightning flashes. Under her hand Nepeese felt the stiffening of his body, and in a moment of uneasy stiffness she heard the sharp, uneasy click of his teeth.

Then the rain fell.

(To be continued)

Ready-made Medicine.—You need no physician for ordinary ills when you have a bottle of Dr. Thomas' Electric Oil. For coughs, colds, sore throat, bronchial troubles, it is invaluable; for scalds, burns, bruises, sprains it is unsurpassed; while for cuts, sores and the like it is an unquestionable healer. It needs no testimonials other than the use, and that will satisfy anyone as to its effectiveness.

A fossil tree, 70 feet long, and estimated to be 1,000,000 years old, has been unearthed in Assoult mining area of Bengali, India.

An Oil of Merit.—Dr. Thomas' Electric Oil is not a jumble of medicinal substances thrown together and pushed by advertising, but the result of the careful investigation of the healing qualities of certain oils as applied to the human body. It is a rare combination and it won and kept public favor from the first. A trial of it will carry conviction to any who doubt its power to repair and heal.

Telephotography is being used experimentally for telegraphing checks.

RENE BLOODED MEN AND WOMEN

Get More Pleasure Out of Life and Are of More Use in the World Than Sickly, Run Down People

There are people who lack the red blood in their lips, warmth to their hands and brightness to their eyes.

These people the easily and cannot compete in school, store or shop with the more energetic. Their blood being thin they are nervous and do not sleep well. During the morning unrefreshed they begin each day badly and miss much of the pleasure of living.

To become active and energetic, like most red-blooded Canadians, these people need a blood-building tonic.

A tonic that gives strength, that revitalizes weak nerves, that increases the appetite and aids digestion, will put color in the cheeks and lips and give vigor to the step. That means new joy in living, increased usefulness and longer life.

Wherever you find a person who has taken Dr. Williams' Pink Pills faithfully, you will find a true friend of the tonic that has made him mean more in many ways. These blood-building pills have been used by three generations of Americans and in almost every community, however small, can be found those who own health and happiness to this famous household remedy.

Weak and Run Down

"I wish from my heart I could persuade every person who is run down in health to give Dr. Williams' Pink Pills a trial." Thus writes Mrs. Louis Mitchell, Oak Point, Maine, who further says:—"About a year ago I was 'weak' in school, suffering from a run down system and impoverished blood. Any little exertion would cause my legs to tremble and my heart to throb violently. I could not sweep a room or walk fifty feet without being exhausted."

Then I began taking Dr. Williams' Pink Pills and after taking only six boxes I am as well and strong as ever. I can walk and run without stopping every few seconds gasping for breath as previously. Dr. Williams' Pink Pills have made it possible in the future if ever my blood needs building up again, and I shall always find pleasure in recommending them to anyone needing a tonic."

Keep Your System Toned Up

Dr. Williams' Pink Pills assist digestion, correct the imbalances, the palpitation of the heart, shaky nerves and the pallor of the face and lips that are the results of thin, impure blood.

Try Dr. Williams' Pink Pills for anemic, rheumatic, neuritis, nervousness. Take them as a tonic if you are not in the best physical condition and cultivate a resistance that will keep you well and strong. Get a box and begin this treatment now.

Send For These Health Books

Two useful books, "Building Up the Blood," and "What to Eat and How to Eat," will be sent free by The Dr. Williams' Medicine Co., Brockville, Ont., if you mention this page.

Dr. Williams' Pink Pills are sold by all dealers in medicine or will be sent by mail, post paid, on receipt of price, 10¢ each per box.

GREECE DEMANDS HEAVY INDEMNITY FROM BULGARIA

Athens.—Greece has demanded an indemnity of 2,000,000 French francs from Bulgaria for what Greece contends was an unprovoked attack upon Greek soldiers at the frontier near Demirhisar. Other demands are set forth, such as an apology and punishment of the responsible Bulgarian officers, in an ultimatum sent to the Bulgarian Government.

Premier Pangalos declared this evening that Greek troops have not entered Bulgarian territory, but have been stationed along the frontier. The initiative for additional military measures, he added, was left to the general commanding the Third Army Corps with headquarters at Saloniki.

The shooting of frontier guards near Demirhisar, on the Greco-Bulgarian border is the cause of the trouble.

Zionist Student Called Martyr

Denies Charge of Attempted Assassination of Polish President

Warsaw, Poland.—Poland appears to be threatened with a Dreyfus case, arising out of the attempted assassination of President Wojciechowski by a bomb at Lemberg last year. A Zionist student, Stanislaw Stelger, who was seen running away after the bomb was thrown, was arrested by the police on the deposition of a ballet dancer, Mme. Pasternak. Stelger vehemently protested his innocence from the beginning, declaring he ran away when the bomb was thrown, for self preservation.

The Jewish population is greatly agitated over the case, regarding Stelger as a martyr and is doing all it can for his defence.

Dominion To Be Represented

Canada Sending Radio Delegate To U.S. Meet

Ottawa.—The department of marine and fisheries will be represented at the fourth United States radio conference at Washington, commencing on November 8, by C. P. Edwards, director of radio for Canada.

The conference is being called by the United States department of commerce, primarily to discuss radio matters in the United States, but following the precedent of previous years, Canada, Mexico and Cuba have been asked to send representatives in order that there may be co-ordination in the development of radio in North America.

Increase In Pulp Exports

United States Will Soon Depend On Canada For Newsprint Supply

Montreal.—Canada's enormous exports of pulp and paper to the United States, more than any other reason had been the main factor in bringing the Canadian dollar back to par and maintaining it at its proper value, declared speakers at the eighth annual convention of the Canadian Paper Trade Association, here.

R. L. Finlay, president of the association, said exports were growing by leaps and bounds, and the time was not far distant "when the United States" would be "entirely dependent on Canada for its newsprint."

Japanese Trade Competition

Chicago.—Great Britain's army of unemployed is great because of the industrial growth of Japan, the United States, and Germany, the London Times says.

Mr. Goodwin, director of the Federation of Master Printers of the United Kingdom and Ireland.

Japanese competition with Great Britain is especially keen along textile and machinery lines, Mr. Goodwin said.

Air Traffic Gunned Up

Chicago.—A traffic cop in the sky to guard crowds from stunt fliers is planned by Morona A. Collins, police chief. "It will not only give the police department with a small patrol plane, equipped with a repeating rifle and powerful searchlights.

Negroes in the Harlem section of New York City own real estate worth \$60,000,000.

Captain Of Liner Is Shot

Capt. Clews of C.P.R. Steamship Melita Is Killed At Antwerp

Antwerp, Belgium.—Captain A. H. Clews, commander of the Canadian Pacific liner Melita, was shot and killed in his cabin on the Melita while he slept. Thomas Towers, first officer, was arrested, charged with the murder. Towers' terrible deeds are thought to be those of a mentally irresponsible.

Captain Clews was a nephew of the late Henry Clews, of Lombard Street and Wall Street, who died in 1923.

Two other officers of the Melita were seriously wounded by the captain's murderer and are in an Antwerp hospital. They are David K. Gilmore, of Glasgow, assistant chief engineer, and John Holliday, of Bootle, England, second engineer.

The account of the tragedy gathered by the Antwerp police is that Towers went to the captain's cabin at 2:40 o'clock in the morning. A pistol shot was heard and the captain was found dead with a bullet wound in his head.

The police say that Towers then entered Gilmore's cabin and shot the engineer in the face.

The noise of the firing brought other officers to the scene, and in a struggle with Towers the second engineer was shot twice in the lungs.

Other members of the crew eventually overpowered Towers and disarmed him.

Predicts Radio Development

May See Newspapers As Complete Pictures Is Forecast

Chicago.—Radio has a future in which entire newspapers will be flashed as complete pictures.

International broadcasting will be commonplace entertainment. Instructions will penetrate to the remotest corners of the world and state will be chained a captive.

This is the vision of Major General James G. Harbord, president of the Radio Corporation of America, revealed in an address delivered before the conference on education and industry at the University of Chicago.

In the near future, Major Harbord thinks, there must be an international conference "to settle grave issues that cannot be much longer delayed."

Settlers From Ukraine

Mennonites Arrive in West For Land Settlement

Saskatoon.—A party of 689 Mennonites from Ukraine have arrived here and will take up farms in Saskatchewan and Alberta. Most of the party will locate in the northern district. Approximately 100 will settle in the Saskatchewan district while some will go into Alberta where arrangements have been made to locate a fairly large number.

The party was brought to Canada under the auspices of the Mennonite colonization board which has its headquarters at Kesteven.

National Economic Conference At Winnipeg

Move to Invite Delegates to Make Tour of the West

Edmonton.—Council of the Edmonton board of trade has decided to take the initiative in a movement to interest western boards of trade in having delegates to the National Economic Conference make a tour of Canada from Winnipeg to the Pacific coast. The economic conference is to be held in Winnipeg, November 16 to 18. It is expected those in attendance will include foremost political economists from all parts of the Dominion.

Foot and Mouth Disease in Britain

Ottawa.—An outbreak of foot and mouth disease among cattle near Manchester, England, has been reported to the department of agriculture. As a consequence of the outbreak, no cattle will be allowed to land near the port of Manchester. There have been no other changes in the regulations governing cattle shipments and the Canadian export trade is proceeding normally.

Poland Gets Loan

Warsaw.—Poland has been successful in negotiating a loan of \$1,000,000,000. M. Grabowski, minister of finance, informed the Warsaw press. The proceeds are to be devoted to economic restoration, particularly for the new issue bank of Poland.

OUR CURRENCY AT HIGH LEVEL ON N.Y. EXCHANGE

New York.—The heavy transaction of recent days in Canadian wheat and the increased demand from tourists for the Dominion's currency are given by officials here as accountable for the high premium of 5-32 of one per cent quoted on the local exchange for the Canadian dollar, and which is necessitating gold shipment across the border.

In the present situation it is more profitable to export gold from the United States than to buy Canadian remittances for transfer.

The Bank of Montreal in New York is understood to have shipped about \$5,000,000 in gold during the last week and the New York Trust Company is transferring about \$2,000,000 worth of the metal to Montreal.

Object To Use Of Title

Wife of Former Emperor of Germany Offends Republicans

Stuttgart, Germany.—Efforts by the Republican Guards to begin proceedings against Princess Hermine, wife of former Emperor William, for alleged foreign propaganda which goes to the world at the same time as goes the serious estimates of his services and character.

"Kaiserin Hermine, have fallen. An attempt to lodge a criminal complaint against her under the penal code, was made at Nurnberg, but the court there passed the allegations along to another court, which declined to present the charge to the district attorney. Likewise the public prosecutor would not take any action.

It was charged that Hermine designated herself as "wife of His Majesty William II, former Emperor." It was also alleged that she was registered in the list of visitors to the Spa at Wildbad as "Empress and Queen," and that a local photographer issued picture postcards of her with the words, "Kaiserin Hermine, in Wildbad, 1925."

Western Sugar Beet Refinery

Alberta Sugar Product Is Now Placed On The Market

Lethbridge, Alta.—The first bag of sugar from the new factory of the Canadian Sugar Refineries Limited, has been placed on sale at Raymond. The factory began slicing beets last week. About 25 per cent of the beets have been harvested, operations having been delayed owing to wet weather. There are 300 men employed at the factory while 500 are busy digging, topping and hauling the sugar beets. With threshing and beet harvest there is a local demand for beet mangeling. Southern Alberta will be for another month. Beets are averaging heavier than expected, some going 20 tons to the acre. The average will probably be about 12 tons. The average sugar content is 18, which is two per cent more than the United States beet growing districts.

Nominated For Peace Prize

Movement in Berlin to Award Nobel Prize to Stresemann

Berlin.—A movement to have the Nobel peace prize awarded to Gustav Stresemann, the German foreign minister, has been started by the National Zeitung.

The proposal has as its motive the desire for international recognition of the minister's efforts and achievements toward establishing world peace and "the necessity of counteracting existing international anti-German propaganda by German international propaganda."

Attributed to Dr. Stresemann's qualifications for the Nobel prize, the paper declares "there never was a statesman or other person so active in promoting universal brotherhood and a new era of post-war peace."

New Race Discovered

London.—Dr. N. S. Gurdokoff claims to have found a new race of people on the River Pura, Western Siberia. He says there are five clans containing more than 600 persons. They call themselves "Nenchen," which means men or people. They have dark hair and complexion and their language is different from that of any of the tribes of the Western Siberian jungles.

Adverse Comment On Photograph Of Prince

Fancy Dress Picture Destroys Dignity Of His Position Says London Paper

London.—Adverse comment is appearing in the newspapers with regard to the press photograph of the Prince of Wales dressed as a girl for appearance in amateur theatricals which was taken about the H.M.S. Repulse on his way home from his trip to West and South Africa, and South America, and it is presumed this photograph has been circulated the world over. The photograph itself is harmless, even innocuous, the Prince's familiar features being scarcely recognizable. He is shown standing with a couple of male companions who also are in fancy dress.

The Manchester Guardian says: "The American press, as well as the English press, has dwelt on his importance as an Ambassador of the Empire, and it was felt in England that a new atmosphere suitable to the dignity and years of His Royal Highness had come to the Prince and had been diffused throughout the world. Then comes this ridiculous, unnecessary, unfortunate photograph which goes to the world at the same time as goes the serious estimates of his services and character."

Disarmament Move

Would Be Welcome

Suggestion Is Good One Is Opinion Of London Editor

Chicago, Ill.—President Coolidge should initiate and carry through a movement for world disarmament at this time, he would be considered as "one of the greatest benefactors of mankind."

A. H. Owen Jones, London, England, editor of The Printer Magazine, in an address opening the 38th annual convention of the United Typothetæ of America.

"If for no other reason than an economic one," he said, "we welcome with enthusiasm the suggestion that President Coolidge should initiate a movement for disarmament."

Disarmament Note

Not Wholly Accepted

Germany Objects to Allies Demand Regarding Police Organization

Berlin.—Herr Von Hoersch, German ambassador to France, who has been in consultation with the foreign office, will shortly return to his post in Paris bearing the German Government's final reply to the allied recent disarmament note. Fundamentally the German Government is prepared to meet the requirements upon which the evacuation of the Cologne area was made contingent. The only point on which an accord has not yet been reached concerns the demand of the allies that designations as to rank in German police organizations shall be abolished.

Temperance Move in Britain

London.—The United Kingdom Alliance, the largest temperance organization in Great Britain, is organizing a big campaign for the coming winter.

The alliance states that its object is to fight for local option, rather than for total prohibition, and it intends to appeal thereon to each of the great political parties in the country.

Wine Gold Medal For Butter

Regina.—Winning a gold medal for butter in the united class, Chris Hansen, employer of the Saskatchewan Creameries, Regina, defeated competitors from New Zealand, Australia, South Africa and the Channel Islands in a competition held by the colonial department of the London dairy, for butter making.

U. S. Sends Destroyers

Washington.—Two United States destroyers have been ordered from Gibraltar to Alexandria, Egypt, to remain in readiness there for use in Syrian ports should their presence become necessary for the protection of American lives and property.

To Make Dry Thanksgiving

New York.—Prohibition authorities have a list of saloons and restaurants where champagne and other liquors have been flowing freely. A dry thanksgiving day is predicted.

WHEAT POOL OF SASKATCHEWAN SUBMITS REPORT

Regina.—Slightly over half a cent a bushel, or \$19,821, was the cost of the first year's operations, ending July 31, 1925, of the Saskatchewan wheat pool, according to the directors' report presented at the first annual meeting of the pool delegates held here. Altogether 140 delegates were present.

The expenses were summarized in the financial statement as follows: Management, \$98,745; Regina office and salaries, \$195,060; Winnipeg office and salaries, \$6,396; adjustment of pool and market spreads with elevators, \$141,947; sundry, \$6,804; preliminary expenses of source grain pool, \$2,092; total, \$478,877, less earnings, \$19,821.

The full deduction of two cents a bushel for acquiring handling facilities was made amounting to \$198,235. The board also decided that the full deduction of one cent for creating a market reserve amounting to \$758,462 should be made. This money was loaned to the central selling agency at six per cent interest.

Among the visitors at the meeting were Colin Bursell, president of the Manitoba wheat pool; D. L. Smith, Winnipeg, sales manager of the central selling agency; S. J. Farmer, Winnipeg, director of publicity for the central selling agency; John H. Winnipic, director of publicity for the Manitoba pool.

Australia Reserves Decision

Cabinet Awaiting Government Approval On Locarno Pact

Sydney, N.S.W.—Commenting on the security pact Premier Bruce emphasized the fact that the agreement specifically affects the British Dominions and India from the obligation therein contained but makes provision whereby the Dominions can endorse the pact if they so desire. The question of Australia's acceptance of commitments can only be determined by the Commonwealth Parliament, and the Australian cabinet has not yet reached a decision on the point he said. "It will not assume any commitments under the pact without parliament's express approval, he declared, and, in addition, the fullest discussion and consideration.

France Carries On Costly War

Heavy Losses in Connection With War On Morocco and Syria

Paris.—France has lost more than 17,000 men and has spent 3,000,000,000 francs in Morocco and Syria since she took over the protectorate and assumed the League of Nations mandate over Syria.

Such is the information imparted to the finance committee of the Chamber of Deputies by Premier Painlevé. In Morocco 3,176 men were killed and 8,287 wounded and in Syria 2,256 were killed, wounded or are missing. The cost in Morocco has been 950,000,000 francs and in Syria more than 2,000,000,000 francs.

Tribesmen Subdued By French

Damascus, Syria.—The French troops have succeeded in crushing the most serious revolt started by the Druze tribesmen since France's occupation of Syria under the League of Nations mandate. The trouble was not put down, however, before a pitched battle was engaged in and an entire quarter of the city of Damascus had been virtually ruined. Artillery, tanks and armored cars were used by the French.

More Communists Arrested

London.—Scotland Yard has announced the arrest of Arthur Manus, chairman of the Communist party in Great Britain since its formation, and John Thomas Murphy, a frequent contributor to the Communist press, on charges of conspiring to incite rebellion and mutiny.

Unusual Charge For Arrest

Jefferson City, Mo.—Lieut. Fred C. Nelson, United States army air service, faces arrest on a charge of "driving, killing and capturing a Canadian goose." Nelson and with the aid of an aeroplane. The unusual complaint was filed by a federal game warden.

Teeing off for a "Round-the-World" Trip

(1) Captain R. G. (Jack) Latta, commander of the Empress of Scotland, is seen on the deck of his ship as a member of the "Round-the-World Golf Club." (2) Captain R. G. (Jack) Latta, commander of the Empress of Scotland, saluting the fairway from the deck of the "Round-the-World Golf Club" tournament. (3) S.S. Empress of Scotland, flagship of the Canadian Pacific line, which will sail on a tour of the world from New York December 31st next.

Here you see Commander R. G. (Jack) Latta, of the S.S. Empress of Scotland, flagship of the Canadian Pacific line, just before and in action as a member of the "Round-the-World Golf Club," teeing off from the deck of his ship and splitting the fairway far into the ocean with the first ball of the tournament. The idea of the club was first started by I. O. Upham, of the San Francisco Golf Club, who on a 1910 boat went ahead with the notion of teeing on foreign golf links across the world, playing one hole on every course with the same ball. He links and hiring twelve men to search for it, to finding the Copenhagen Golf Club, Denmark, occupied by the whole Danish army. Before returning to San Francisco he had played on 55 courses. Captain Latta is one of the latest members of the Club and a number of fellow members will sail on the Empress of Scotland on December 31st from New York on the fifth yearly cruise of the globe undertaken by C.P.R. Vessels. The coming trip will cover 27,320 miles, nineteen countries, every kind of climate, race and tongue, and will return to New York in 1926 from a trip occupying 129 days.

Canada's Wool, Woollen and Knit Goods Industry at the C. N. E.

L. Mrs. Crockett, wife of the late Gen. Crockett, is seen at the exhibit of Canada's Wool, Woollen and Knit Goods Industry at the C. N. E. She is seen wearing a suit of suit made from wool grown on the Alberta ranch of L. B. H. Crockett. In the foreground is the prize bred Canadian lamb presented to her by the officers of the Canadian Co-operative Wool Growers Association.

Tens of thousands of people obtained an entirely new idea of the wool growing and wool manufacturing possibilities in Canada at the exhibit of the Wool, Woollen and Knit Goods Industry at the Canadian National Exhibition. The pillars of wool from the nine provinces of Canada, supplied by the Canadian Co-operative Wool Growers Association excited considerable comment, and emphasized the fact that although we maintain only 2,500,000 sheep and lambs in Canada, the size, feed conditions and climate would permit the keeping of 25,000,000, and that sheep keeping is the most profitable branch of agriculture. Also that of the 70,000,000 lbs. of wool used annually to clothe the population of our country, some 50,000,000 could be grown here instead of only 15,000,000 lbs. as at present. The small factory installed with twenty operatives showed the actual manufacture in Canada of fine

woolen and worsted yarns, the weaving of fine blankets, woollen cloth and worsted cloth, and the knitting machine making underwear and hosiery. It was a miniature representation of the work that is being done in over two hundred and seventy woollen and knitting mills in over one hundred and forty municipalities.

The finished goods display, which showed what the completed goods looked like after being made on the machines, showed that in quality and style the \$75,000-000 worth of goods produced by the industry annually were equal, and in many cases better, than goods made abroad. It conclusively showed that so far as climatic, physical and technical conditions in Canada are concerned there is no reason why 90% of the woollen and knit goods used in Canada should not be produced in Canada.

The Tractor In Russia

Is Rapidly Taking Place of Old Wooden Plow

Gradually the American tractor is making triumphant progress in Russia. It is being distributed by the co-operative organizations on easy terms of payment to peasant communities and is replacing the old wooden plow. Up to 1914, there had been imported into Russia only fifty tractors. At the beginning of 1925, the government had brought its purchases up to 1,825. The importing programme for this year provides for the purchase of an additional five thousand.

How Robert M. Koenig
Found Remedy for
Pimply Skin

For years my skin would break out every once in a while—and sometimes did very little to help me. I read a doctor's article stating that pimply skin usually comes from the stomach—and I began to get rid of the pimples.

I tried Carter's Little Liver Pills for a few days—and since that time my skin is smooth and clear. Now I tell my friends the right way of getting rid of a broken out skin—and also of securing clear of upset stomach and sick headache. Carter's are all you claim for them.

Building Boom in Rome
Building is progressing so rapidly, particularly in suburban sections of Rome, that the municipal authorities are unable to keep pace in furnishing names for the streets, and numbers for the houses.

Women Can Retain
Their Good Looks

—The Mattland Photo Studio

Mrs. Wm. Fletcher of 28 Cherry St., Stratford, Ont., says, "Dr. Pierce's Favorite Prescription is a tonic and nerve that I would recommend to every woman nearing middle life. I found it not only quieted my nerves, but it also relieved me of hot flashes, dizziness and backaches. Before I took the 'Prescription' I had the strangest sort of pain, like a knife cutting thru my back. I took four bottles of the 'Prescription' and can truthfully say every particle of pain has disappeared and I am feeling as well as any person could."

Go to your neighborhood drug store at once and obtain this Prescription in tablets or liquid, or send 10 cents to Dr. Pierce's Laboratory in Bridgeport, Ont., for trial package.

W. N. U. 1600

Rats Cause Much Damage

Britain's Annual Loss Through Rodents is Said to be \$2,000,000. Owing to the recent invasion of Buckingham Palace by rats and their increase throughout the country, the Anti-Rodent Society has started its fall campaign, urging housewives, shopkeepers and all other patriotic citizens to "do your rat-killing early," says a dispatch from London. The country has been aroused to action by a recent statement estimating the annual loss to England through rats at approximately £70,000,000 sterling.

Earache, Toothache
Now Quickly Subdued

These are the sort of ills that call for a powerful and certain remedy. When your tooth is jumping, when you want ease and comfort in a hurry, you always get that quick relief from trusty old "Nerviline." Many who have proved the unfailing merit of Nerviline call it "King over Pain." Certainly no family can afford to be without a bottle of this dependable medicine. Nerviline is a protection against a hundred minor ills, such as cramps, gas on the stomach, neuralgia, toothache, headache, etc. Get a 50c bottle from your dealer to-day.

Canada produced about \$20,000,000 worth of honey last year.

Aesop's name first appears in literature of about 570 B.C.

The Flaring Silhouette

A fluttering, flaring line—this is the picture of the autumn mode. The flare at the sides sponsors the new freedom of motion for fall in tailored frocks. Chic, practical and simple in design is this crepe-satin frock with the convertible collar extending into long tabs the width of the neck opening. The tailored sleeves are long and snug fitting at the wrist. The circular dresses with pointed top divided into two sections and joined to the plain front and back at the hip-line. The back section of the dounce may be omitted, leaving a long, plain back. The diagram pictures the partly finished garment, and pattern No. 1201 is in sizes 34, 36, 38, 40 and 42 inch bust. Size 38 bust requires 3 1/2 yards of 36-inch, or 3 3/4 yards of 40-inch material for the plain dress, and 1 1/4 yards of 36-inch, or 1 3/4 yards of 40-inch material for the circular frock. Price 20 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

Minard's Liniment for Colds

WORLD HAPPENINGS
BRIEFLY TOLD

New York University has inaugurated its fourth year of air college. More than a million students joined in on the radio broadcast lectures last year.

Christian Krogh, noted Norwegian painter, is dead at the age of 73. He devoted himself largely to portraying sailors and fishermen and landscapes of a simple type.

An amateur at Perth, West Australia, has received a radio message from Sweden, transmitted with a power of only 18 watts. It is claimed this is a world's record.

William Dineen, a pioneer of the business life of Toronto, and one of its best known citizens, is dead, aged 81. Mr. Dineen for many years represented Roman Catholic citizens on the board of education.

A foolproof monoplane which can be held in the air with any one of its three motors and will travel at a 115-mile an hour clip, without control by human hands has been successfully demonstrated by Anthony H. O. Fokker, noted Dutch designer.

For
COLIC AND CRAMPS
PAINS IN THE STOMACH
There's Nothing Equals

It has been in use for over 50 years; its action is pleasant, rapid, reliable and effective. It relieves colic promptly.

"Don't accept a substitute!"

The genuine is put up in glass vials, Dr. W. Milburn Co., Limited, Toronto, Ont.

Char Plant As Drainage
Laguna Products Corporation, of Bantock, will establish a clay plant at the Midland mine in Drumheller within sixty days. It produced a highly efficient fuel.

Health cannot be looked for in the child that is subject to worms, because worms destroy health by creating internal disturbances that retard development and cause serious weakness. Miller's Worm Powders expel worms and are so beneficial in their action that the systems of the little sufferers are restored to healthfulness, all the discomforts and dangers of worm infection are removed, and satisfactory results are assured.

A church in Cornwall, Eng., has a devil's door, through which the devil is supposed to pass out.

TOOTHACHE

Put in the face with Minard's in water and place a piece of cotton wool, saturated with Minard's in the cavity.

Every man has a right to be an agnostic, but no man has a right to be proud of his lack of understanding.

Relieves Asthma at Little Expense. Thousands of dollars have been vainly spent upon remedies for asthma and colds, all over, with any result. Dr. D. Kellogg's Asthma Remedy, despite its assurance of benefit, costs so little that it is within reach of all. It is the national remedy for asthma, far removed from the class of doubtful and experimental preparations. Your dealer can supply it.

Corn Culture in the West
Corn is steadily gaining in popularity throughout the west as an aid to diversified farming and it is estimated that 100,000 acres were grown in Saskatchewan last year. Although seed was scarce in 1924 and the price rather high, the acreage will probably be slightly higher this year than last.

Many mothers can testify to the virtue of Mother Graves' Worm Expeller, because they know from experience how useful it is.

Church Convention

The Alberta district of the Evangelical Lutheran Synod of Manitoba met in St. Paul's church, at Golden Spike, on Oct. 21 and 22 for its fall convention. Nine pastors and nine delegates of congregations were in attendance. Four sessions were held. The main part of each of the first two sessions was devoted to the reading of a doctrinal paper on "The Priesthood of All Believers," by Rev A. Goos. On the basis of many Scripture passages this doctrine was clearly stated, and a lively discussion followed. In the third session considerable attention was given to the work among the young people of our churches. Rev E. Goos dealt with this subject in a lengthy paper, in which he showed the necessity of this work and gave an outline on how it could be done. The lay delegates took special interest in the discussion following. The fourth session was a business session. Here a number of questions relating to the external affairs of the Church were discussed and acted upon.

On Wednesday evening a pastoral service was held, in which Rev E. Dueterhoff delivered the confessional address and Rev H. Klingheil preached the sermon on Galatians 5:1.

Big game and trappers' licenses on sale at the Sun office. C. N. express money orders are now on sale at Clarke's Drug Store.

Stony Plain and District.

Election returns will be received tonight by radio at the Oppertshanser hardware store and at Mr. Michael's hardware store.

Judge Dubuc sat in the District Court in Stony Plain yesterday. A number of applicants for naturalization papers appeared.

Agent Phil Fuhr has sold a six-cylinder Essex coach to young Mr. Gitzel.

Ralph Gobel and the Enders brothers arrived home on Sunday from a month's motor trip thru the threshing districts of Saskatchewan.

Miss E. V. Emerson, superintendent of Lashburn (Sask.) Municipal Hospital, has been visiting with her sister, Mrs. M. McKinlay, for the past two weeks.

At the local Court on Monday a young farmer of Blueberry district was fined for illegally impounding a neighbor's milk cows.

Mr. Geo. Oppertshanser on Tuesday installed a Westinghouse Radiola at the home of Mr. Bileau.

Mr. P. H. Schwindt, the well-known character at Spruce Grove, is in an Edmonton hospital, recovering from an attack of pneumonia and receiving treatment for three fractured ribs.

Eggs are the scarce commodity at present, in this town.

There is a rumor current in Edson that a change will be made in the train service on this division on or about Nov. 15th.

A Halloween dance is billed for Garden Valley Schoolhouse next Saturday evening.

The Harvest Thanksgiving service at St. Matthew Evangelical Lutheran Church, at the Grove, was held Sunday last. A special musical service was given, and Pastor Poetzsch delivered an address appropriate to the occasion.

The chicken shooting season closes Saturday Oct. 31. The open season for trapping muskrats in this district is March and April 1925 only. Bats may not be trapped anywhere before March 1st.

Forms for Wheat Pool contracts may be had at the Sun Office.

Here and There

It is understood a Scottish syndicate has purchased sixteen acres of land adjoining the best residential section of Vancouver, B.C. and will erect one hundred residences there.

Although only three years old the Oliver district of British Columbia has already become noted for its production of very fine cantaloupes. This year the production is expected to be about 25 to 26 carloads.

The 1,250,000-bushel Government Terminal grain elevator being built at Prince Rupert, B.C., will be completed by November 1st, when a test shipment of ten carloads of grain will be made through it.

Notification has been received by the Hon. John S. Martin, Minister of Agriculture for Ontario, that his showing of white Wyandottes at the New York State Fair at Syracuse, had captured the trophy for the best display for the twentieth consecutive year.

By a recent Order-in-Council of the Lieutenant-Governor premiums for clearing land, which had previously been set at \$5 an acre, were increased to \$25. The Order also provides that the premium will be paid for a maximum of twenty acres of land and, as a result of it, a settler may obtain a grant of \$160 from the Government as a reward for his work.

Considerable progress has been made during the past few years by E. M. Palmer, of Corvichan Bay, B.C., in the cultivation and propagation of new species of gladioli. In his garden, Mr. Palmer has at present growing about 150 different varieties, bulbs having been secured from all parts of the world, even Central Africa contributing its quota to this wonderful collection.

Having completed their tour of Canada as the guests of E. W. Beatty, chairman and President of the Canadian Pacific Railway, the ten British journalists left Canada early in October for England, to relate there the story of their experiences and to give their readers the impressions they have gained of the Dominion.

During the month of August 1,132 vessels, comprising 131 trans-Atlantic, 35 coasting and 966 inland steamers, entered the port of Montreal, these having a total registered tonnage of 1,928,945, while in the same period 1,141 vessels went out, these representing 1,932,145 net registered tons. Since the opening of navigation 767 ocean-going vessels, representing 3,468,995 net tons, have entered the port, are compared with only 649, representing 2,280,072 net tons last year; these figures being up to the midnight of September 5th.

F. F. Norcross, a well-known Chicago lawyer, had an amazing experience recently while staying at the Banff Springs Hotel and playing on the golf course there. His approach to the ninth hole was disrupted by a huge bull elk which tossed its antlers and stood pawing the ground with evident hostility as the lawyer prepared to play his ball. Mr. Norcross was about to observe the better part of a volley when the bull's attention was distracted by the appearance of a cow elk which made an effective substitute for the golfer and both animals disappeared into the neighboring bush.

Travelling in a five-passenger 1920 improved model Ford touring car from Halifax to Vancouver, J. L. S. Scrymgeour and E. Pickering are performing a feat unique in the annals of motor travel in this country. From Franz, near Banff B.C. Marie, they travelled on the tracks of the Algonia Railroad to Port William, having been granted the use of the line by the Canadian Pacific Railway. The whole run of about 4,500 miles took nearly eight weeks, and a series of still and moving pictures were taken en route to commemorate the adventure.

The Touring

Color—Black. All-steel body of streamlined design. Double ventilating windshield. Ford leather-clad one-man top. Tool box under front seat. Standard equipment includes cord tires, weather-proof side curtains opening with all doors, windshield wiper and nickel-plated headlamps. Speedy and dependable runs 255 extra. Price f.o.b. Ford, Ontario \$445

The Improved Ford Touring Car

An all-steel body on the improved chassis, with a new top designed to harmonize with the reduction in height, gives the Touring Car a grace and smartness heretofore unapproached.

Advances in comfort have kept pace with improvements in design. Placing the fuel tank under the cowl has made it possible to lower the seats, giving greater leg room and added comfort for driver and passengers. Ventilation and driving vision are improved by the new touring windshield, the lower half of which is adjustable.

The side curtains, generally re-designed to conform to body and top changes, add the final detail of touring comfort.

When in place, the curtains open with the doors and combine wide vision with lasting durability.
